Iván Raczkowski

DevOps at Miracle Devs, Inc
Rosario, Santa Fe, Argentina

Extracto

Iván is an Network and IT specialist and the current Head of DevOps and Security with over 8 years of experience in the software industry. He has a robust background in designing, implementing, and maintaining IT and network environments for small, medium, and large companies. Additionally, he finds operations challenges, particularly those that involve automation, to be enjoyable.

I have gained extensive knowledge in administering monitoring and security systems, including automating processes, both on premises and in the cloud. I possess the necessary skills to set up servers for monitoring and filtering network traffic, utilize tools for penetration testing and detecting backdoors, and implement applications for network sniffing and analysis. Additionally, I have experience in implementing firewalls and UTM platforms with Sophos, Check Point, and Fortinet, including configuring rules for web proxy (both explicit and transparent), integrating authentication via Kerberos and NTLM on virtual schemas based on Microsoft systems over Hyper-V, configuring IPS and antivirus controls, and reversing proxy with SSL Portals.

Based on my experience, I possess a strong aptitude for teamwork, effective communication, and leadership. I take a proactive approach to identifying issues and providing strategic solutions for them. I am committed to continuous learning and improvement, and I am capable of adapting to changing scenarios.

Specialties: management, cloud, container, leadership, strategy, writing, IT and Network architecture, virtualization, serverless, Cisco, Mikrotik, Fortinet, Sophos, OpenStack, Google Cloud, AWS, Azure, Kubernetes, Docker, Linux, Ansible, Git, DevOps, CI/CD, Azure DevOps, speaker, lecturer, author, certified.

Experiencia

Miracle Devs, Inc

1 año 6 meses

Head of DevOps and Security Leader

2022 - Present (1 año)

Recent work experience in Miracle Devs:
