## Professional Summary

Security Lead and Head of DevOps with more than 15 years of experience in enterprise infrastructure, cybersecurity, cloud platforms, networking, and IT operations. Experienced in security governance, infrastructure automation, cloud security, DevSecOps, and resilient technology operations.

Currently serving as CISO, with responsibility for ISO/IEC 27001:2022, risk management, compliance, audit readiness, disaster recovery, and business continuity. Strong background in STRIDE, OWASP Top 10, MITRE ATT&CK, NIST guidance, identity and access management, and secure software delivery.

## Professional Experience

### Head of DevOps and Security Lead

Miracle Devs, Inc. · 2022–Present

Lead cybersecurity, infrastructure, cloud security, and DevSecOps initiatives across Azure and AWS. Drive threat modeling, security governance, ISO/IEC 27001:2022, identity, risk, resilience, and secure CI/CD practices.

### Infrastructure Consultant, Level 2

NeuralSoft · 2016–2021

Designed and operated replicated datacenter networks, BGP peering, FortiGate security, Linux environments, OpenStack private cloud, VXLAN, and MikroTik automation.

### Networking and Infrastructure Instructor

EducacionIT Rosario · 2017–Present

Teach practical networking, Linux administration, infrastructure, and cybersecurity through hands-on labs, including MikroTik and Cisco CCNA-oriented training.

### IT and Network Support

Neoris · 2014–2016

Supported South America infrastructure, routing, LAN/WAN, enterprise Wi-Fi, Linux and Windows servers, IP telephony, and technical escalations.
